San Bernardino Raceway is the ultimate go-karting experience! We take special care of our customers, and work hard to provide an outstanding race experience for every customer, every time!

Our new gas-powered Sodi RT8 karts ensure a more authentic race experience than our competitors' electric karts - you can better control your speed, without the constant need for braking. After just one race, customers improve their speed and finesse around the twists and turns of our latest track.

Come check out our recent remodel and enjoy an air-conditioned escape from the heat. There's plenty of room for the whole family, so sit back and relax and catch the score on the current game or NASCAR standings on our 5 flat screen TV's! Or keep up with the current go-kart race and positions in our lobby with our 3 leader board monitors.

At S.B.R. safety is our #1 priority! We devote extra time with Jr. racers to ensure they understand how to operate the go-karts and feel comfortable while lasting memories are created. We take time to explain braking and lifting techniques that they understand how to drive safely!! For added precaution - we can remotely control the speed of each kart.

We also have air hockey and pool tables, arcade games and even fun stuff for kids under 8 years of age.

Wondering where to have your next unique Birthday party? Well wonder no more...we have private party and meeting room available. We offer exclusive track rental, parties with private room rental, corporate parties and events, team building and birthday packages. As well as receptions, grad nights, charity functions, fund raisers, award presentations, bachelor/bachelorette parties, Quincenneras, and more!

Ask one of our Race Coordinators about current package pricing, daily specials, and Endurance Races.
